

12 November 1965

MEMORANDUM FOR THE RECORD

SUBJECT: TID Meeting on 10 November 1965

25X1A

25X1A

1. A meeting held in TID on 10 November 1965 with []
[] revealed the following information:

a. The existing DBR for the KH-4 material is unreliable and break-down is common. However, they feel it will suffice for awhile. In the meantime, they desire a new reader be developed to handle specifically the [] system which is comparable to the present KH-4. Included in the new reader should be that logic necessary to handle the KH-4 if it differs from []

25X1

25X1

b. That the so-called "Universal DBR" will handle only about 50% of their requirements - that they will still require readout of []

25X1A

25X1A

2. [] is preparing another memorandum to P&DS in support of the above.

3. They would also like to see a hard-copy printout incorporated in the Universal DBR.
